EDUCATION

University of Texas at San Antonio Full Stack Development Bootcamp (01/2022-07/2022)   ***Grad Date 07/13/2022**

Being a student in the Full Stack development bootcamp required dire commitment and determination. Besides the two days of class, 20+ hours a week at the least were the bare minimum required to get a grasp of the 2 years' worth of class content, not including the challenge assignments due weekly. Besides the modules and classwork, the challenges prepared for real-world or on-the-job tasks that real developers do. Among those modules and homework were topics like creating a password generator with **JavaScript**, a command-line game as well as portfolio, team, and markdown generators with **Express and Node**, making **API calls** to create a weather app, **Sequelize and MySQL,** connecting our app using **MongoDB** and deploying to a live server like **Heroku.com**, and building a portfolio with **REACT.js.**

PROJECTS/WORK at UTSA

Event-Seeker
https://jwhitney2209.github.io/event-seeker/

Technologies used:
- HTML, CSS, Bulma, JS
- jQuery
- Moment.js
- OpenWeather API
- TicketMaster API

Helped team work on CSS/Bulma styling and OpenWeather API to make calls to get weather of certain cities and their current events accessible to all users from any given location. App was fully functional and mobile-responsive
Noted
https://mighty-sea-96505.herokuapp.com/

Technologies used:
- Bulma, JS
- Node.js, Express.js
- Deploy app to cloud platform, Heroku.com

Created an application accessible to anyone who wants to keep track of tasks by adding, saving, and deleting everyday tasks. View and utilize deployed app live on Heroku.com
Group Project 3
(to be uploaded)

WORK EXPERIENCE

11/2017-05/2018   **Patient Access,** Methodist Texsan Hospital- San Antonio, TX

- Data and patient info entry, insurance verification

- Admitting inpatients and ER outpatients
- Ensuring the hospital maintains compliance with Federal regulations, JCAHO, and Department of Health standards

Impact: Being a registrar creates the initial impression for patients and sets the atmosphere for a most convenient medical experience. My role helped maintain organization and communication between registration, patients, and medical staff, while clearly informing patients about bills, making the revenue cycle more simple, and less debt for the hospital.
